Umar Saeed Qureshi

FLUTTER & WEB DEVELOPER

Pakistan · umar@umarsaeedqureshi.com · Website · GitHub · LinkedIn

PROFESSIONAL SUMMARY

Flutter and web developer experienced in building mobile applications, integrating Firebase and APIs, and delivering responsive digital products. Independently developed and published Beautify on Google Play and built the Magnet Masala storefront. Uses modern AI-assisted tools to support iteration, debugging, and implementation while retaining hands-on technical judgment and responsibility for review.

TECHNICAL SKILLS

Mobile: Flutter, Dart, GetX, Provider **Services:** Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging, REST APIs, Google Maps and location services
Web: Responsive web development, e-commerce interfaces **Workflow:** Git, GitHub, testing and release preparation
AI-assisted tools: ChatGPT, OpenAI Codex, Claude Code

SELECTED PROJECTS

Beautify — Flutter Mobile Application	Independently developed and published Android app for salon and beauty-service discovery, appointment booking, and salon-side service management. Flutter, Dart, Firebase, Google Maps, and GetX are identified in the project record. Google Play · Case study
Magnet Masala — Responsive E-commerce Website	Responsive storefront for a Pakistani spice brand, with product discovery, a basket, and WhatsApp-based order continuation. Contribution details and implementation stack are not specified in this resume. Live website · Case study

PROFESSIONAL EXPERIENCE

Zamindar Technologies	Mobile app development experience. Company product context is shown on the portfolio. Company website
Token Talent	Mobile app development experience. ESS product context is shown on the portfolio. Company website

AI-assisted workflow: Engineering-led and AI-accelerated. I use coding assistants to explore solutions, debug, and refine implementations; code review, testing, and final decisions remain my responsibility.
